Experience Apple Vision Pro

Join us to start your spatial computing journey, access exclusive enterprise apps, and establish clear and actionable next steps toward your goals. In this briefing, you'll gain an understanding of spatial computing, including the Apple Vision Pro, its underlying technology and full capabilities.

Cupertino, California | New York City, New York | Austin, Texas

Agenda

Introduction. About Apple Vision Pro™ and Spatial Computing. 45 minutes

An overview of the technology and features that enable the breakthrough spatial experience that Apple Vision Pro delivers. Gain insight into real-world applications across multiple industries that illustrate how enterprises are leveraging the power of spatial computing.

Inspiration. Curated Demo Experience. One-hour

A personalized Apple Vision Pro fit for each attendee—including guided enrollment and navigation of visionOS™. Explore the capabilities of spatial computing through a demonstration of exclusive enterprise applications across a number of use cases.

Ideation. Art of the Possible. 30 minutes

This debrief session is meant to capture impressions and feedback from the demonstration experience. Collaborate and discuss potential use cases that are applicable across various teams—or across the entire organization. Participants will align on next steps to design and build your unique spatial computing journey.

Contact your SHI Account Executive to inquire about a two-hour Apple Vision Pro experience.
